

How to Use Map Overlays

Note: This guide is designed to show you how to find and use overlays. There will be a guide showing you how to create an overlay.

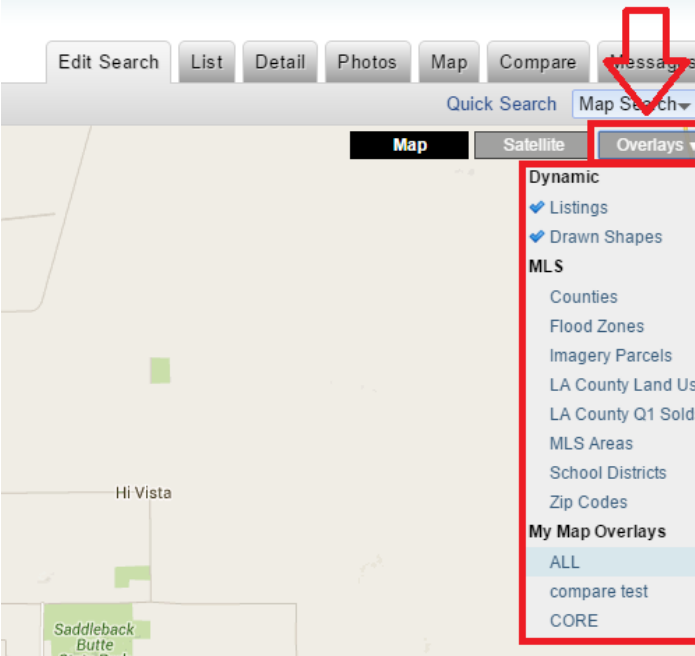

Step 1) Go to "Search" then "Map" Search

Step 2) Choose your listing type. (For this example we will do residential).

Step 3) On the right hand side of the Map Click on "Overlays" then choose from one of the Overlays below.

Step 4) View applied overlay

- In this example the overlay for "MLS Areas" was chosen. As you can see below it shows the MLS Areas highlighted along with the corresponding area #. Feel free to experiment with the other overlays as well to get a feel for them.
